Description: MITI Systems Inc. was founded in

March, 2008 and has developed various types of the polymeric microneedles by micro processing technology. We are manufacturing and supplying the microneedle components for roller and stamp and mainly used to increase the absorption rate of the effective ingredients, such as high molecular weighted or hydrophilic materials in cosmeceuticals. Recently, we have been developed cosmetics that are differentiated from general functional cosmetics that barely pass through the skin membrane due to the needling effect of soluble microneedles, and can expected to improve wrinkles around the eyes, skin density, and skin moisturizing effects.

Hall & Booth no: P1 R33

Description: The business unit syNeo® Cosmetics, which has existed since 1995, came about through the collaboration with a pharmacist, who produced a proven, effective but not very skin-friendly antiperspirant. The objective was to increase the effectiveness of the recipe and at the same time, further improve skin compatibility. After 2 years of research and development the predecessor of today's syNeo antiperspirant product assortment was produced. In the years that followed our development concentrated on additional variants and application forms to cover the entire spectrum of the various manifestations of excessive sweating. Now the customer will find the appropriate syNeo product for virtually every region of the body. Since then, the syNeo® Cosmetics business unit has been consistently expanded. In Europe we are represented by independent sales partners.

In addition to Germany, syNeo products are also available in the following countries: The Netherlands, Austria, Switzerland, Liechtenstein, Spain, Belgium, Luxembourg, Poland, Russia, Kazakhstan, and China.
